

The following is an overview of Ultra Aviation Services, Inc. Financing Division.

Ultra Aviation Services can secure low interest loans from piston engine to turbine jet aircraft. Our loan minimum is \$100,000.00 up to a maximum of \$10,000,000.00.

Loans can be closed in as little as 3 business days after approval, (it can take from 24 hours up to 3 business days for approvals).

Rates can be fixed for up to 25 years on aircraft 3 years and newer, and for up to 20 years on aircraft manufactured from 1985 to 2000.

An "A" credit rating is required to qualify for the preferred aircraft loan rates.

*When applying all **signed** applications must be accompanied by their last 2 years **signed** IRS 1040-forms, (for most applicants the first 2 pages of their tax return should suffice, along with C, D or E schedules if they show significant income or depreciation on those schedules. Also required is a copy of your most recent paycheck stub for income verification. Another requirement is verification of liquid assets, (i.e. bank statements and stock or mutual fund statements).*

If approved, all applicants must provide the following before closing:

- 1. A spec sheet on the aircraft verifying any equipment other than standard.*
- 2. A purchase and sales agreement signed by both buyer and seller, which reflect the purchase price.*
- 3. A certificate of insurance showing hull coverage on the aircraft with a breach of Warranty in favor the lien holder, with 30 days notice of cancellation.*
- 4. A recent color photo of the aircraft showing the N#, and a photocopy of the logbook entry for the most recent **Annual** or **100 hour inspection**.*

Rate quotes are valid for 30 days from date of approval and loan approvals are valid for 90 days from the approval date.

Since rates change frequently, please call or E-mail our office for a current rate quote.

I look forward to working with you.
